# Your personal kitchen, always

A kitchen is more than a room in your house, it's the place for beautiful moments with family and friends. It's what makes your house a home. That's why it's not enough to simply buy a kitchen that fits your house, you need a kitchen that fits you!

Making beautiful kitchens attainable is what drives us every day. With an extensive, up-to-date collection we offer everything you need to make this possible. Keller stands for Dutch Design at its best.

Keller kitchens are fully customizable, meaning they don't just look good, they also match your way of living. That's one of the many advantages Keller offers. Others include standard Grid 130 dimensions and the unique Keller Colour System, allowing you to combine colours and materials without any of the side effects, such as colours that don't match. You'll find out more further on in this brochure.

As a purely Dutch brand, with over 80 years of experience and a new state-of-the-art factory we are able to make the kitchen of your dreams. To help you do so, we exclusively sell Keller kitchens through trusted kitchen specialists. Here, experienced professionals will help you design your personal Keller kitchen. This way, you are assured to receive a high quality, beautiful new kitchen as well as expert advice and professional service. A Keller kitchen deserves no less. And neither do you...

# Why choose Keller

## Lacquered handle trims

For a finishing touch, the handle trims of our handleless kitchen are available in the 9 colours of the MASTER Collection, the 1950+ colours of the NCS range and our new 5 metallic lacquer colours:

- ✓ Gold
- ✓ Copper
- ✓ Bronze
- ✓ Titan
- ✓ Gun Metal

## Horizontal and vertical handleless

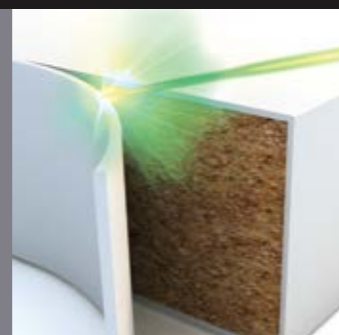

An attractive look is determined by the eye for detail. That is why the handleless Keller kitchens are really handleless - in every aspect. Not just horizontally, but also vertically. This way the effect of minimalist design is not interrupted in any way. The result is clean, pure and perfectly contemporary.

## Pure quality is the starting point, always

A long lifespan and carefree use are standard ingredients of a Keller kitchen. Whether it's the extra sturdy quality of carcass and doors, the silent soft-closing hinges and drawer runners, or the high-quality brackets: Keller only works with the very best materials and brands.

## Laser edging

The average kitchen has a lot to contend with. It is exposed to moisture, heat and intensive daily use. Well finished unit fronts can significantly extend the service life of the kitchen. Now, using laser technology, it is possible to achieve a more beautiful finish and longer lifespan than ever before. Thanks to precision of laser technology, no adhesive seam is visible after bonding. This means that the unit fronts look sleeker and the edges are easy to clean.

## Grid 130

Keller Kitchens offers the innovative Grid kitchens. The standard Grid 130 cabinets offer more cabinet space, a lower plinth and an optimized working height. Read more about the advantages of this system on pages 82 & 83.

## NCS colours

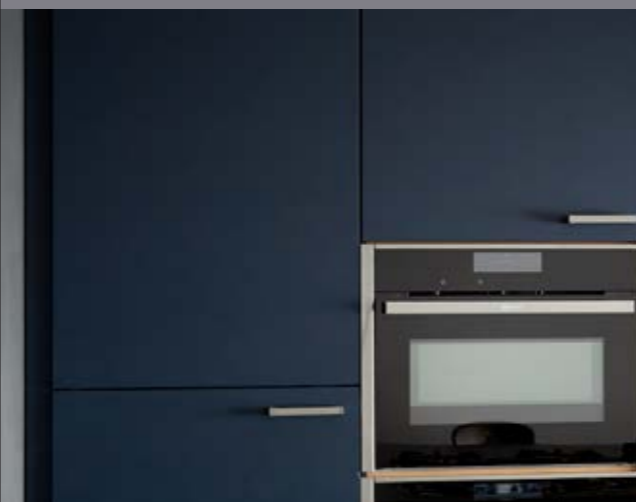

All lacquered models are available in 1950 different NCS colours. It is possible to finish the whole kitchen or just a detail in these colours. Keller offers them in 3 different finishes: silk gloss, high gloss and structured lacquer.

## Narrow 4/4 mm gap between fronts

To open your kitchen doors correctly, a small gap between fronts is needed. With a Keller kitchen, this gap never exceeds 4/4 mm, horizontally and vertically. The result is a sleeker, more beautiful design.

## We bring the world of International design to you

Keller Kitchens has its own design team with a vision. A team that keeps a close track of the international developments and trends and interprets these to the local kitchen markets. This way, Dutch design is created with your needs, wishes and way of life in mind. The perfect kitchen match.

# And there is more...

## Mix & match with the Keller Colour System

Combining was never this easy. With nine contemporary colours in six different materials and price groups, you have everything you need to design your own personal kitchen, in which all elements are perfectly matched. As a result, all kitchens from the MASTER Collection can fit into every budget.

## Exclusively available from your kitchen specialist: professional advice

Quality is a matter of trust. That is why Keller Kitchens can only be found in a real specialist's showroom, where people are driven by their love for the profession. Where skilled professionals are there to guide you. From the moment you choose the right design, to the moment you first admire your new personal kitchen.

## A wooden kitchen without compromise

Authentic materials and elements often determine the ambiance of a kitchen. That is why the fronts of all wooden Keller models consist of solid wooden frames with veneered inner panels.

## Guaranteed 100% made in Holland

Buying a new kitchen is an important choice. One that you make for years to come. That's why you don't rush it, but make thought trough decisions. We believe you expect the same from us. At Keller Kitchens we manufacture your personal kitchen ourselves. With the same care. In our own factory in the Netherlands, skilled professionals work every day to make your personal, dream kitchen a reality.

## Customized according to personal wishes down to the smallest detail

Every person is unique, so why shouldn't your kitchen be unique as well? At Keller we do not stop at the wide range of standard cabinets. Based on a clever kitchen program and many years of knowledge and experience, Keller knows how to meet even the most specific customer demands. Want a place to store your wine? We can make that for you, in the same colour as the rest of your kitchen. And with the same top quality as you would expect from us.

## Customization and design at an affordable price

Customizing a kitchen also means: fitting the budget. Together with the expertise of the skilled professionals in the showroom, our wide range of models, materials and finishes ensures that Keller has a kitchen for every budget. A comfortable thought for those who are looking for a balance between price and perfection.

## Over 80 years at the top of the European kitchen industry

The success of Keller Kitchens did not happen overnight. Since our start in 1935, our high-quality kitchens found their way into hundreds of thousands of homes. Today, based on many years of experience and expertise, we are creating luxury kitchens for our demanding clientele. And that is why Keller occupies a firm position in the top 10 of leading European kitchen manufacturers.

## Manufacturer's warranty

Keller offers a 5-year warranty on all kitchen furniture. This underlines the quality of our products. Should the quality or finish not meet the standard we will replace it free of charge.

# Every wooden kitchen is unique

There is hardly any material which is as individual as wood. Used in the kitchen it fulfils the requirements of design, visual appearance and surface feel.

Because it's a natural product every wooden kitchen is unique. Complete with knots and flaming wood structures. Every wooden kitchen has its individual style and flair.

Solid wood unit fronts are made from a solid timber frame and veneered internal panel. There is a choice of fine and coarse wood. All solid timber models can be finished with stain, silk gloss or structured lacquer.

Choose from the 9 colours in the MASTER Collection, the 1950 NCS colours or 5 stain colours.

# When we say 1950 colours, we mean 1950 colours

From yellow to green and everything in between, the Keller COMFORT Collection makes everything possible thanks to NCS, the Natural Colour System®.

NCS is a logical colour notation system which builds on how humans see colour. Each colour can be described by its degree of similarity to the elementary colours yellow, red, blue, green, white and black.

NCS has defined 1950 standardised colours at every tenth step of the colour space to represent the entire colour space. The Keller Kitchens COMFORT Collection offers you 1950 colours in one of the following finishes:

- ✓ structured lacquer
- ✓ silk gloss lacquer
- ✓ high gloss lacquer

Whether it is the whole kitchen, or a small detail: it's your choice.

# Grid 130

Keller Kitchens offers the innovative Grid kitchens. The standard Grid 130 cabinets offer more cabinet space, a lower plinth and an optimized working height.

Since 1981 the population's height has grown by 2.6 cm. As a result, the required worktop height has also increased. Besides this, the design of a kitchen is becoming more and more important.

With the introduction of Grid 130, cabinets will be taller which increases the storage volume (e.g. base units 5.7 %). It also results in an increased working height of 942 mm for perfect comfort. Aesthetic advantages like a neater design, beautiful lines and a lower plinth height are also achieved.

## **Ergonomic**

By maintaining vertical steps of 130 mm, our cabinets are higher resulting in a standard working height of 942 mm. This is less stressful for the back and thus offers more working comfort.

## **Aesthetic**

Because of higher cabinets, the Grid kitchens have a lower plinth. Sleeker lines and a neater design are some of the other aesthetic advantages of the Grid 130 system.

## **Economic**

Grid 130 also provides functional benefits. It creates 2.1 % more storage space in our tall (midway) units. For the base units, it increases storage space with 5.7 % and the volume of our wall units even increases with 10.8 %. You get more space, for the same budget.

# In-house manufacturing

For over 80 years, Keller Kitchens has been finding its way into the homes of demanding consumers. These kitchens have all been manufactured in our factory in the Netherlands. Our state-of-the-art factory — covering over 56,000 m<sup>2</sup> (602,000 ft<sup>2</sup>) — is one of the most modern kitchen factories in Europe. Here we manufacture over 2,500 kitchens per week.

In our factory, everybody works together to constantly improve our kitchen solutions. This is done with an eye for detail, because that's how we are able to continue to manufacture high-quality kitchens. Highly efficient production methods lead to excellent price/performance ratios. You'll be pleasantly surprised by how much Keller kitchen you will get for your budget. And always with a 5-year unconditional warranty. A term that, in practice, we take rather liberally.

# Colours

## Mix & match with the Keller master collection

Combining was never this easy. With nine contemporary colours in six different materials and price groups, you have everything you need to design your own personal kitchen, in which all elements are perfectly matched.
